heavy metals - **Cd, Cr (VI), Hg and Pb** –, are not intentionally used and are not known to be present in our raw materials.

This declaration applies only to the composition of granules, and may not be extended to end products obtained by any modification of the composition, any processing conditions which could lead to contamination of material or improper use of granules.

During the production the compound is not in contact with mentioned substances, but we cannot exclude their presence as impurities deriving from the environment or as traces in the raw materials.

The exact content in the final part needs to be tested by the applicant.

The products listed above are not tested to check any possible presence of the substances mentioned above. Please note that this testing process is not a standard procedure within Sirmax SpA.

This information and our technical advice - whether verbal, in writing or by way of trials – are given in good faith but without warranty, and this also applies where proprietary rights of third parties are involved.

Our advice does not release the user from the obligation to check its validity and to test our products as to their suitability for the intended processes and uses.

The application, use and processing of our products are beyond our control and, therefore, entirely the user responsibility. This declaration does not waive the responsibility of user, who must check whether finished products are appropriate for the specific final use.

The information contained herein is accurate and reliable as of the date of issue, however we do not assume any liability whatsoever for the accuracy and completeness of such information.
